

Yang Yifei (Fisher)

+65 97799537 | yifei.yang@u.nus.edu | Singapore

Research Interests

- Labor Market Inequality
- Technological Change and AI Development
- Political Economy
- Macroeconomic policy, especially Monetary and Fiscal policy

Education

Johns Hopkins University (SAIS)

M.A. in International Economics and Finance (Dual Degree with NUS)

GPA: 3.74/4.0

Washington D.C. | Jul. 2025 - Jul. 2026

- Selected Courses: Econometric Quant Methods (I, II, III), Modeling in R, Big Data, Central Banking in Developing Countries

National University of Singapore (LKYSPP)

Master in International Affairs (Dual Degree with JHU)

GPA: 4.3/5.0

Singapore | Aug. 2024 - Jul. 2026

- Selected Courses: Coding for Public Policy Using Python, Economic Development, Global Politics and Economy

China Foreign Affairs University

B.Econ. and B.A. (Dual Degree Program)

GPA: 3.77/4.0

Beijing, China | Sep. 2020 - Jul. 2024

- Selected Courses: Macroeconomics, Economics of Money and Finance, International Economics

Research Experience

Does Education's Effect on Political Participation Vary Across Cultures?

Nov. 2025 – May. 2026

Capstone Project, SAIS

Supervisor: Prof. Filipe Campante

- Conducted cross-country analysis of World Values Survey Wave 7 microdata to examine heterogeneous effects of education on political participation.
- Estimated instrumental-variable models (2SLS), using language spoken at home as an instrument to address endogeneity.
- Cleaned and merged multi-country data and documented a reproducible R workflow for analysis and figures.

GDP Convergence: Empirical Cases from China, the US, Japan, and South Korea

Aug. 2025 - Nov. 2025

Course Research Project, SAIS

Supervisor: Prof. Jaime Marquez

- Used IMF World Economic Outlook data and autoregressive time-series models to examine comparative GDP-per-capita convergence paths.
- Evaluated alternative quadratic and logarithmic specifications, moving-average adjustments, and robustness checks; interpreted results in relation to productivity and structural change.

Who suffers the most from government layoffs: Case Study of San Francisco

Feb. 2025 - Apr. 2025

Course Research Project, LKYSPP

Supervisor: Prof. Lawrence Jin

- Cleaned and restructured a 167,464-observation administrative salary dataset covering public-sector job categories in San Francisco.
- Applied unsupervised clustering in Python to identify employee groups with differing salary structures and potential layoff vulnerability.
- Constructed a vulnerability index and translated the descriptive findings into a policy-focused research memo.

Professional Experience

Research Assistant | Centre for Global Studies, Tsinghua University

Beijing, China | Oct. 2023 – Apr. 2024

- Conducted structured literature review and organized qualitative datasets to support policy briefs on geopolitical and economic developments. Systematically tracked regional policy developments and synthesized findings into analytical memoranda.
- Produced data-informed briefing materials integrating quantitative indicators and policy analysis.

Tech Group Intern | BCW China

Beijing, China | Mar. 2023 - Jun. 2023

- Built structured monitoring framework to track global AI regulatory developments across jurisdictions, using Excel.
- Organized multi-source open-source data into analytical dashboards (Excel) to identify regulatory trends.
- Produced visual summaries to communicate policy risk exposure and strategic implications (Power Point).

Research Assistant | Institute of Asian Studies, CFAU

Beijing, China | Nov. 2022 - Feb. 2023

- Organized the 2022 Training Program for Future LMC Diplomats, led communication among ASEAN participants. Transcribed and translated speakers' lectures, drafted post-event summaries.

Awards and Scholarships

- MIEF Merit-based Scholarship Johns Hopkins SAIS (2025–2026).
- LKYSPP–SAIS Dual Degree Scholarship National University of Singapore (2024–2025).
- Outstanding Student Scholarship China Foreign Affairs University (three awards: 2021–2024).

Research Methods, Computing, And Languages

Qualitative Methods: Process Tracing, Case Studies, Interviews

Quantitative Methods: Panel Data Analysis, DiD, Regression Discontinuity, Time-series, Instrumental Variables

Software: R, Python, Stata, EViews, Excel, Matlab, LaTeX, Claude Code

Languages: Mandarin Chinese (native); English (professional working proficiency); Japanese (JLPT N1).
